

TRUECHART Core

TRUECHART Core is the main engine of TRUECHART. All our other TRUECHART products are based on this set of high-level functions, that are detached from any other BI system.

TRUECHART Core enables you to integrate TRUECHART into your own website without needing a full featured BI system environment. Add your data from the source of your choice, define the features you want to have and go.

The *TRUECHART Core Guide* has more information on:

- [Build an app with TRUECHART Core](#)
- [TRUECHART Core API Reference](#)
